Refreshment Center 4

Model 797

The Refreshment Center 4 – Our Largest combination merchandiser providing more sales and less re-stocking.

SureVend™ is a remarkable new guaranteed product delivery system.

The type of innovation you've come to expect from National Vendors. Infrared technology detects whether the vended product has dropped, guaranteeing that your customers either receive their product, or get their money back. It keeps customers happy and profits healthy.

Can Module

Easy front loading system – just roll the cans into place. The can module provides 10 selections with 220 unit capacity.

Easy Loading

Each shelf tilts forward at 45°, making it easy to reach even the upper shelves.

Merchandising Flexibility

Sell candy and snacks on the same shelf. Motors couple easily & dividers slide out to convert to either candy or snack.

Continuous Price Rolls

Just dial up the correct price. No more little price tabs that fall out, get lost, or are hard to find.

Sales Promotion

Winner Mode builds customer traffic with pre-determined products and interval (from 1:10 to 1:9,999).

Selected items can be discounted with time-of-day functions or offered 'Free Vend.'

Electronic Features

Self diagnostics – description appears in plain English on credit display when cabinet door is opened, and any failures are stored and shown in order as corrected.

Data can be recalled for total machine sales and each individual selection.

Each selection can be individually priced.

User friendly menu selection pad.
