# Refreshment Center 3

## Model 785

Refreshment Center 3 – The complete solution. Vends snacks, cold cans and hot beverage in less than 11 square feet of space.

### SureVend™ is a remarkable new guaranteed product delivery system.

The type of innovation you've come to expect from National Vendors. Infrared technology detects whether the vended product has dropped, guaranteeing that your customers either receive their product, or get their money back. It keeps customers happy and profits healthy.

**Merchandising Flexibility**  
Sell candy and snacks on the same shelf. Motors couple easily & dividers slide out to convert to either candy or snack.

**Easy Loading**  
Each shelf tilts forward at 45°, making it easy to reach even the upper shelves.

**Continuous Price Rolls**  
Just dial up the correct price. No more little price tabs that all out, get lost, or are hard to find.

**Electronic Features**  
Self diagnostics-description appears in plain English on credit display when cabinet door is opened, and any failures are stored and shown in order as corrected.  
Data can be recalled for total machine sales and each individual selection.

Each selection can be individually priced.

**Can Module**  
Easy front loading system – just roll the cans into place. The can module provides 8 selections with 136 unit capacity.

**Hot Drinks**  
Coffee, hot chocolate and rich espresso, whipped cappuccino for exotic tastes.

Unique, award-winning drip method brewing process produces true "Restaurant style" coffee.

Each cup is individually brewed by blending the perfect ratio of premium ground coffee to filter purified water. (Optional)

AUTO-RINSAN® pre-programmed, electronically controlled rinse/sanitation system automatically cleans the brewer and drink systems.

Optional water filter cartridge removes flavor killers, giving hot drinks their best taste.

Selected items can be discounted with time-of-day functions or offered 'Free Vend.'
