Vending Systems

INCREASED PRODUCTIVITY • INCREASED VOLUME • INCREASED PROFITABILITY

BevMax2^{EP} is changing the way consumers feel about automated retailing. We're building confidence and creating convenience through better merchandising techniques, more product selections, more capacity, faster delivery times, more capable payment systems and more reliable operation.

DUAL GATE VEND SYSTEM

- Dual Delivery gates provide a "truly" seamless vending system.
- Allows for faster loading time to increase productivity.
- Multiple shaped packages can be vended without adjusting the set-up.
- Quick and easy to load.
- Dual gate design prevents product from falling if machine is rocked.
- No solenoids /No harnesses.

CABINET

- Beverage trays allow for full 20oz. / 600ml capacity on all trays (360 bottles).
- More capacity reduces delivery service costs.
- Enhanced lighting provides excellent brand visibility.
- Attractive bright white interior.
- Cabinet design allows for pallet jack use during installation.

DELIVERY CUP

- Full product visibility.
- Simple design for long life.
- Allows for a wide range of package sizes.

TOUCH PAD AND DISPLAY

- Membrane switch keypad provides positive selection feedback.
- Vacuum fluorescent display enhances consumer.
- Extra space designed for card reader and recycler mounting.

SERVICE DOOR

- Bill validator meets ADA height of 54 inches.
- T-handle lock secures door at two points for added security.
- Vaulted compartment provides added protection for electronics and money systems.
- Dual door design reduces loss of cooling when the service door is open.

XY DELIVERY SYSTEM

- Gentle handling of product minimizes foaming.
- Fast, smooth, and accurate motion provides the consumer an entertaining vend experience.
- Mounted with-in cabinet for enhanced reliability and long life.
- Does not interfere with product visibility while in the stand-by position.

ROTATING DELIVERY PORT

- Convenient, consumer-friendly waist high product retrieval.
- LED illuminated.
- Positive vend detection.
- Vandal resistant, prevents pilfering into cabinet.

GLASS DOOR DESIGN

- Door opens 90° flush to allow it to be placed in a bank or next to a wall.
- Large glass door provides better product display.
- Product is just 6 inches behind the glass bringing the product closer to the consumer.
